Dental Wellness

Discover the connection between good oral health and better overall health.

Dental wellness.

Taking care of your oral health with regular dental visits plays a key role in your overall well-being. When you see a network dentist, your plan covers preventive dental care.

UnitedHealthcare®

50% of U.S. adults over 30 have gum disease.[1]

Take advantage of your dental plan to help keep your gums in check.

Wellness benefits are covered at 100 percent when you see a network dentist. Benefits include:

Two routine checkups in a 12-month period—one every 6 months.

- Includes cleanings.
- Some plans cover more cleanings for an additional copay.

Annual oral cancer screenings for covered adults (age 18 and older).

Screenings may include:

- Light contrast screening: A test that uses light to help your dentist find healthy and unhealthy tissue.
- Brush biopsy: A tissue sample taken from a suspicious area.

Extra cleanings and gum treatments for expectant mothers—as recommended by your dentist.*

The coverage includes:

- Dental cleanings while you're pregnant and 3 months following delivery.
- Deep scaling (non-surgical gum treatment).
- Gum maintenance.

Ask your dentist to include the name of your obstetrician and your due date on your dental claim. Share this letter with your dental office to inform them of this benefit. We'll handle the rest.

How oral health **can affect pregnancy.**

Gum disease in pregnant women may be linked to complications like pre-term births and low birth weights.[2]

Know the warning signs.

Gum disease is a painless condition many people don't realize they have until it's already done significant damage. When your gums become infected, bacteria and toxins enter your bloodstream, which may worsen other health conditions. If you experience any of the following, see your dentist immediately.

- Red, swollen or tender gums.
- Gums that bleed when you brush.
- Bad breath.
- Loose teeth.
- Changes in how teeth fit together.

#1

chronic infectious disease to affect children is tooth decay.[3]

1 in 5

cases of total tooth loss are linked to diabetes.[4]

4x

higher risk of stroke for people with severe gum disease.[5]

Adopting good oral health habits when young helps prevent issues when older.

Help your kids start good habits early.

- When your child's teeth first appear, brush them twice daily with a soft toothbrush or wipe with soft gauze or a washcloth.
- Make first dental appointment at age 1.
- At age 3, add a pea-sized dab of fluoride toothpaste and continue to brush their teeth twice a day.
- Floss when teeth start touching.
- Limit sugary snacks and drinks.
- Provide meals from the 5 basic food groups.
- Take your child to the dentist regularly and ask about sealants and fluoride supplements.

Regular screenings can help reduce risk of:

Diabetes
Diabetics have a weakened immune system, which may make it harder to keep bacteria from causing gum disease and raising blood glucose levels.

Heart disease
Gum disease allows bacteria to get into your bloodstream and puts you at risk for heart attack and stroke.

Respiratory conditions
Gum disease bacteria can be inhaled into your lungs, and increase your risk of pneumonia and infections.

Rheumatoid arthritis
Gum disease can increase the severity of arthritis.

Discover the **mouth-body connection.**

Your mouth reflects your overall health.

Your dentist can detect signs of disease.

Infections in your mouth can affect your entire body.

DENTAL

Welcome

to your California Select Managed Care Direct Compensation dental plan.

Thank you for choosing a dental plan from UnitedHealthcare. We're here to make your health care experience easier.

Get to know your dental plan.

With this plan, your coverage begins right away. You don't need to meet a deductible. There's no annual maximum, which is the limit to how much the plan will pay each year, and the plan doesn't exclude care for dental issues you may have had before becoming a UnitedHealthcare member.

Preventive care.

As long as you see your primary care dentist, your plan pays for all or most of your preventive dental care, including routine checkups, cleanings and annual oral cancer screens for adults. You can get two cleanings in a 12-month period — one every six months. Some plans cover more cleanings for an additional copay.

Preventive visits are important because your dentist can catch problems early when they're easier to treat. Good oral health helps protect your teeth and gums and is also linked to your overall health.

Fillings, crowns and more.

Your plan also covers other types of dental care, including fillings, crowns, and braces. You just need to pay a copay (a set dollar amount) at the time of your appointment. Some plans only cover silver fillings for back teeth. If you choose white fillings, you may have a higher copay.

Get extra dental visits when you're pregnant.

Increased bacteria levels in a pregnant woman's mouth can lead to tooth decay. Your plan covers extra visits for cleanings and gum treatments when you're pregnant, as recommended by your dentist. Ask your dentist to submit a claim to the address on your ID card. Be sure to include the name of your OB/GYN and your pregnancy due date.
